

CS IMC

About us

The expert section of Iron Monument Club Plzeň, called as CS IMC, was established on 14th April 2006. It was found in accord with the statutes of Czech Union for Monument Conservation (CSOPa) o.s. and it is a part of 1th ZO IMC Plzeň.

It associates the active people, who are interested in history and current state of transport (especially rail transport). The main goal is to find the information and to document the state of individual traffic systems all around the world. For that reason, CS IMC organizes thematic trips and excursions for its members and fans. From every excursion, there is prepared the report, including photo documentation, for each participant. The report informs about the state of visited railways and the news, which was found on the place. The most interesting information from the reports is published in our websites.

The second, no less important, goal of CS IMC is to build the tourist museum railway in locality Soos – Kateřina. This little railway should supplement and extend the current nature trail passing through nature preserve Soos.

Each participant of a collective action, especially an excursion, is considered to be a fan of CS IMC. We decided to create our own websites with the information and pictures from realized actions to inform the people about our activities. As we obtain a lot of authentic information and knowledge about traffic from our journeys, we would also like to publish it by form of various lists and statistics.
